A SMART FORM MANAGEMENT
SOLUTION POWERED BY AI

DigiSign is a simple yet sophisticated all-in-one platform that enables easy creation, editing, and signing of documents. Using Google's DocAI, DigiSign also prompts empty or wrongly filled fields in real-time. This ensures proper filling of forms or any document which needs to be completed. This saves manual processing of data, fastens registrations and ensures proper documents.

CAPABILITIES

◆ **Step-forms**

Split a single form into multiple parts in accordance to different roles, sequences, and statuses of completion.

◆ **Intelligent Identification**

Easy splitting of forms with completion status, user prompts to make the form completion process smoother.

◆ **Safe and secure**

Enables digital signatures to be captured for Consent Authorization.

◆ **Data Privacy**

Uses ironclad data safety and privacy compliance to help secure and safeguard your data.

◆ **Storage, Retrieval, & Utilization of Form Data**

A foolproof data storage and retrieval system ensures smooth form management.

◆ **AI-based Identification of Absent Fields**

DigiSign uses Google's DocAI to identify and notify absent fields in your forms with ease.
