

Doctafix

APPOINTMENT SCHEDULING HAS NEVER BEEN THIS EASY

Doctafix is a full-fledged Doctor-Patient appointment process scheduling application, with intelligent capabilities. With Doctafix, any clinic or patient can leverage the application to schedule, reschedule, cancel appointments, and monitor the treatment status.

HOW IT WORKS

FOR DOCTORS

- Unified appointment management portal keeps a track of patients registered for drug administration.
- Schedules appointments for each patient, either individually or in bulk.
- Reschedules appointments in case of no-show.
- Transfers available patients from appointment to administering phase.
- Communicates each update over multiple channels (Call, WhatsApp, Email, etc.)

FOR PATIENTS

- Locates the nearest Treatment Centres according to your treatment preferences.
- Schedules appointments easily and naturally.
- Keeps a track of drug administration timelines.
- Communicates each update over multiple channels (Call, WhatsApp, Email, etc.)
- Logistics support possibilities ensure assistance at every step of your treatment.

WHY

Doctafix

...

■ SIMPLIFIED APPOINTMENT PROCEDURES

A secure, digital solution that removes the need for shelf-spaces and quickens patient creation & appointment scheduling. It also allows you to manage multiple patients and their respective appointments at the same time.

■ OMNICHANNEL CAPABILITIES

DoctaFix is tightly coupled with MIC, which provides a seamless and consolidated omnichannel experience for information transfer over email, SMS, phone, and other communication applications.

■ COST-EFFECTIVE AI-FIRST SOLUTION

DoctaFix is integrated with industry-leading Google CCAI for a truly comprehensive and intelligent Appointment Scheduling experience.

■ QUICK DEPLOYMENT

DoctaFix requires minimal customization from the get go, and offers a completely modular, cloud-based deployment.
