OMS
ORDER MANAGEMENT SYSTEM

THE MOST ADVANCED
ORDER MANAGEMENT SYSTEM
FOR YOUR ENTERPRISE

OMS is an omni-channel Order Management System that ensures efficient processing of orders from single to multiple channels, and integrates them in a single platform.

OMS also automates workflows wherever possible, to facilitate reduction of manual processing of orders.

OMS is also capable of seamlessly integrating with other third-party patient onboarding portals.

CAPABILITIES

Single sign-on for Patient Portals and OMS for HCPs

Effortless order creation, reallocation, cancellation, and tracking

Easy-to-use interface allows uninterrupted switching between patient portals and OMS

Efficiently manage patient No-shows with appropriate order reallocation

Robust data privacy measures use only deidentified user values like user reference ID.

BUSINESS
BENEFITS

500+
Hours of manual order
processing reduced
annually per person

100%
Seamless integration
with multiple systems

365
Days of continued
support across channels

WHY
OMS

➤ ## Deep AI Expertise

OMS is developed by a team of proven expertise, with a history of acclaimed and awarded products, who live and breathe AI.

➤ ## Flexible and Modular

OMS offers a completely modular solution including integrations with various third-party systems to ensure flawless experience to the users.

➤ ## Seamless User Experience

OMS offers quick and easy navigation between patient portals and order management systems, reducing the need for multiple logins.

➤ ## 360-degree patient view

HCPs have a complete perspective over the entire patient journey including patient orders and drug administration history.
